Jiva Upgrade to 6.5 Testing

Started testing January 2024, going live on August 26th

- **Jiva is the system that Wellmark uses to manage their UM, CM, and Appeals processes**
 - Third party system – the vendor pushes out regular upgrades/updates
- To keep Wellmark on the latest version of Jiva, we must upgrade from **6.1 to 6.5**
- ‘Unplug everything and plug it back in’
 - New servers, new infrastructure, almost completely new implementation
- The business usually only tests in PREP – we also test in SIT/QES

Improve the Business

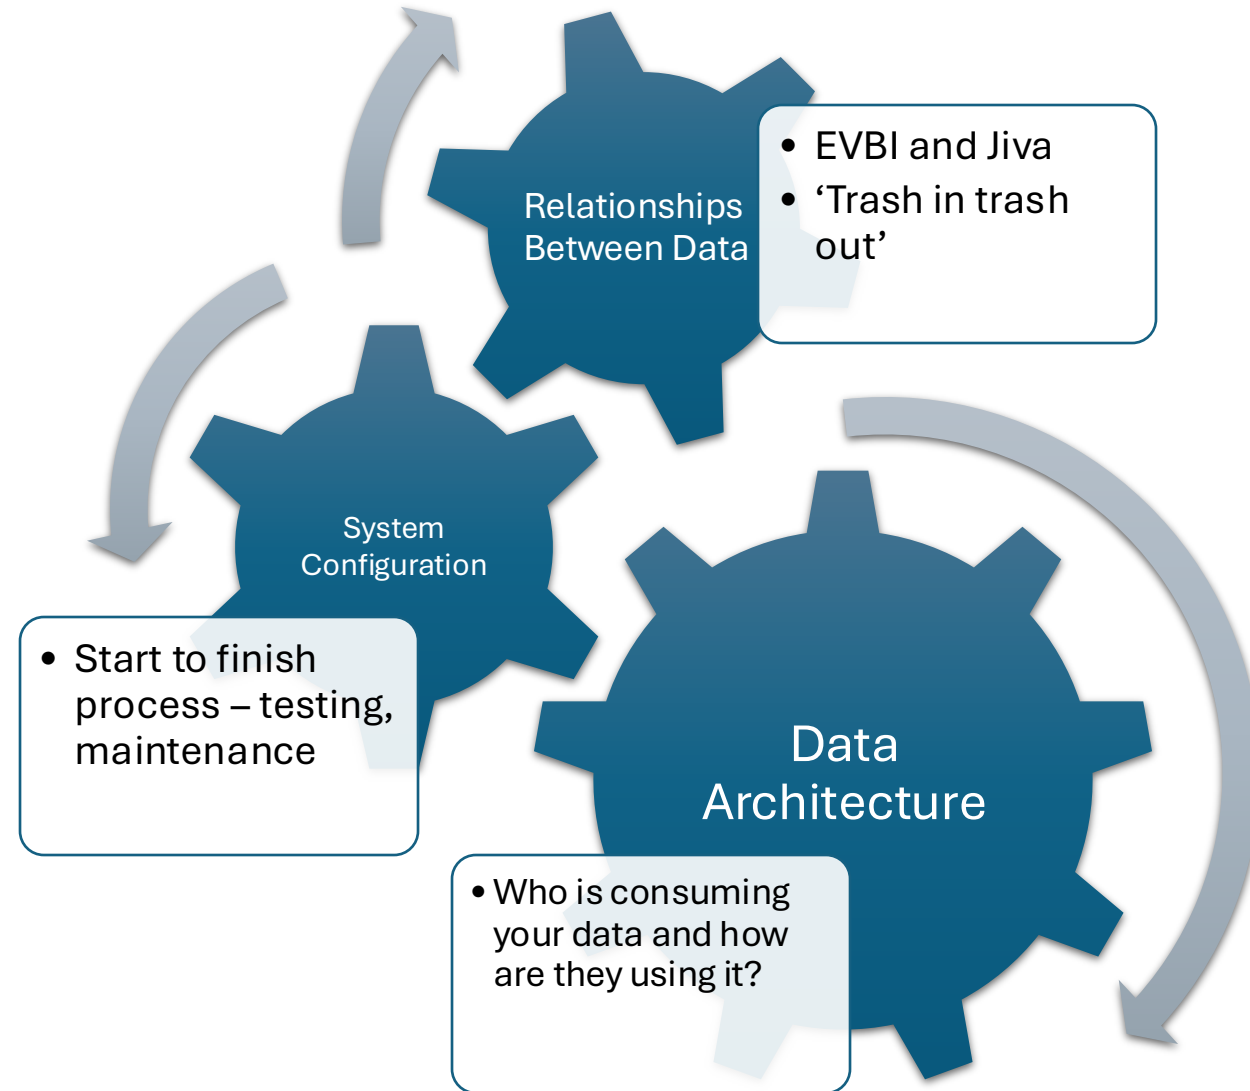

HSS Transactional Sync Validation

- Created episodes of each type/trait in Jiva PREP 6.1
- After the sync was completed (3 weeks later), verified that each episode was correctly synced in Jiva PREP 6.5

AWS Member Satisfaction Survey IVR Testing

- Ran tests for a new over the phone survey
 - With a member after the closure call post-graduation of a program
- Tested to make sure that the responses were being correctly recorded in the database.
